

Asociace NGV in collaboration with Czech Biogas Association is pleased to invite you to the international conference

## „Opportunities of natural gas and biomethane in transportation in the Czech Republic“

taking place on the **6<sup>th</sup> of October 2010**

at the conference hall of AURORA spa in Třeboň, Czech Republic

---

Natural gas started to be used as vehicle fuel in the Czech Republic since 1981, when first vehicle conversions had been performed. In 90's Czech Republic was ranking on the leading positions in the world regarding use of natural gas in transportation. Well progressed gasification programme has slowed down, stagnation became reality. Czech Republic was overcome by other European countries, that started later with utilization of gas in transportation. In the beginning of 21<sup>st</sup> century interest in natural gas increases again. Czech Republic experiences significant development of gaseous fuels in transportation.

Main topics of the conference:

- Latest development and trends in utilization of gaseous fuels in Europe and in the Czech Republic,
  - Best practice examples, pilot projects and current status of technology in the EU and Czech Republic
  - Presentation of unique european project GasHighWay
  - Status and trends of R&D within industry
  - Legislation and its future development
